

MATTHIAS AMIRE

Software Engineer | Technical Support & Troubleshooting | JavaScript, TypeScript, APIs

+234-814-457-0900 • Lagos, Nigeria • <https://matthiasamire.com> • codydematth@gmail.com

ABOUT ME

Software Engineer with 3+ years of experience building, integrating, debugging, and supporting production web and mobile applications. Strong background in JavaScript/TypeScript, React, React Native, REST APIs, authentication, CI/CD, and application troubleshooting. Experienced in investigating frontend, mobile, API integration, authentication, performance, and deployment-related issues across production systems. Particularly interested in Developer Support, Technical Support, Product Support, Implementation, and Integration Engineering roles where strong software engineering knowledge can be applied to diagnosing problems and helping users and developers resolve technical issues.

SKILL

Programming: Javascript, Typescript

Web & APIs: HTTP/HTTPS, REST APIs, JSON, CORS, API Integration

Troubleshooting: Chrome DevTools, cURL, Postman, Network Debugging, Application Debugging, API Troubleshooting

Developer Tools: Git, GitHub Actions, Azure DevOps, CircleCI, CI/CD

Mobile: React Native (Expo)

Frontend: Next.js, Vite, Tailwind CSS, Shadcn/ui

Backend: REST APIs, Node, FastAPI Development

Authentication: OAuth, Token-Based Authentication

WORK EXPERIENCE

Localbuka, Nigeria- Freelance Frontend Engineer

Dec 2025 – Present

- Develop and maintain a production restaurant discovery platform using Next.js and TypeScript.
- Integrate frontend functionality with backend APIs for restaurant data and user interactions.
- Build and troubleshoot restaurant listings, filtering, search, and dynamic content functionality.
- Diagnose frontend and API integration issues affecting application behavior and user experience.
- Develop and maintain the company's marketing website.
- Investigate performance, responsiveness, accessibility, and cross-device UI issues.

SterlingTech & Data Science, Nigeria- Frontend Engineer

OCT 2023 – JAN 2026

- Led frontend development for People's Store, an e-commerce platform built with Next.js, TypeScript, Redux, Tailwind CSS, Shadcn/ui, and FastAPI integrations.
- Integrated frontend applications with backend APIs and investigated issues across client-server interactions.
- Built search functionality including typo tolerance, voice-to-text input, and relevance filtering.
- Led frontend development for DATR (Directorate of Air Transport Regulation) using React, TypeScript, Tailwind CSS, and Redux.
- Diagnosed and resolved application issues during development and integration across production-facing frontend systems.

Jupiter.io, Nigeria - Mobile Engineer

FEB 2025 – AUG 2025

- Built core functionality for a production social fashion mobile application using React Native, Expo, and TypeScript.
- Implemented post feeds, comments, and user interaction flows.
- Integrated mobile functionality with backend APIs and investigated integration failures.

- Diagnosed and resolved mobile-specific bugs and performance issues.
- Optimized large-list rendering and application behavior for data-intensive and interactive screens.

Keepsafe ng, United Kingdom – Frontend Engineer

Nov 2024 – DEC 2025

- Built the Keepsafe mobile application and administrative web interface using React Native, React/Vite, Tailwind CSS, and Shadcn/ui.
- Implemented and troubleshot OAuth authentication using Azure.
- Integrated secure file-upload and document-verification functionality.
- Developed profile setup, verification workflows, role-based dashboards, and other application functionality.

TAWOL Technologies, Nigeria– Frontend Engineer

FEB 2023 – APR 2024

- Developed multiple internal platforms including Client Manager, Lead CRM, Save For Future, and TBS Suite using React, React Native, and Redux.
- Collaborated with backend engineers to integrate frontend interfaces with backend functionality and troubleshoot integration issues.
- Participated in pull requests, code reviews, unit testing, and integration testing.
- Worked with CI/CD pipelines and assisted in diagnosing development and deployment-related issues.

Delbott, Nigeria– Mobile Engineer

SEPT 2022 – DEC 2023

- Built a logistics mobile application with delivery-management functionality using React Native.
- Developed order-handling and delivery-management workflows.
- Built login and onboarding experiences for mobile users.
- Diagnosed and resolved application issues during development of mobile workflows and interfaces.

EDUCATION

UNIVERSITY OF THE PEOPLE
B.Sc. Computer Science

2024–PRESENT

FEDERAL POLYTECHNIC, ADO-EKITI
National Diploma in Computer Science

2016–2018
